## CBx TRAINING SERIES

(compiled in collaboration with Innovate UK)

We've been working hard to develop our new series of **tailored cross-industry courses** to provide energy and carbon literacy, and the skills to understand and manipulate resulting data for valuable communication. Our series of one-day workshops have been designed to accommodate delegates from across the industry, and to endorse a **joined-up understanding** of their distinct roles and influence over the performance gap.

### **DAY 1: WHAT DATA?**

17 November 2015  
Central London

### **DAY 2: INFORMING CHANGES**

19 November 2015  
Central London

### **DAY 3: BOARD BUY-IN**

23 November 2015  
Central London

*"For a novice like me, the exercises structured the complex task of reviewing building energy-use into meaningful steps involving validation, analysis, comparison and reconciliation of data. The "data interrogation" set made me feel like a detective at work!!"*  
**- ATTENDEE, DAY 1**

*"A very informative day that covered all the key energy topics and equipped me with the knowledge and practical tools to go away and really start to drive down energy consumption"*  
**- ATTENDEE, DAY 2**
